Direct-Fed Microorganisms, Min.....	334 million CFU/lb
(Lactobacillus acidophilus and Propionibacterium freudenreichii)	

INGREDIENTS

Ground Corn Cobs, Wheat Midds, Soybean Hulls, Dehulled Soybean Meal, Cottonseed Hulls, Cane Molasses, Calcium Carbonate, Montmorillonite Clay, Salt, Monocalcium Phosphate, Ground Flaxseed, Zinc Amino Acid Chelate, Copper Amino Acid Chelate, Manganese Amino Acid Chelate, Cobalt Glucoheptonate, Manganous Oxide, Ferrous Sulfate, Zinc Sulfate, Copper Sulfate, Sodium Selenite, Vitamin E Supplement, Vitamin A Acetate In Gelatin, Mineral Oil, Vitamin D3 Supplement, Ethylenediamine Dihydroiodide, Cobalt Carbonate, Dried Lactobacillus Acidophilus Fermentation Product, Dried Propionibacterium Freudenreichii Fermentation Product, Lactose and Silicon Dioxide.

FEEDING DIRECTIONS

Feed 2% of body weight to incoming cattle, along with grass hay. Contact Rowe Nutrition LLC for additional feeding information. If fed as directed this product does meet or exceed Vitamin & trace mineral requirements of cattle.

SHOW CATTLE: Feed at the rate of 20-100% of the grain ration (see mixing directions) depending on desired Gain/depth of body & Spring of Rib.

PRECONDITIONER: Feed to incoming cattle not accustomed to grain starting out at 2% of there body weight.

NOTE: Free choice grass hay should always be available.

Warning: Contains high level of copper. Do not feed to sheep or any species sensitive to copper.

Guts Fully Loaded

Major Brand

As demonstrated in the above picture Guts Fully Loaded expands 45% more than the major brand after adding water and stays expanded longer.

RATION		1	2	3	4	5	6
Net Energy Gain		.49	.47	.45	.43	.41	.38
Guts .49 DX	% Fed =	100	80	70	50	30	
Guts Fully Loaded	% Fed =		20	30	50	70	100
Fiber %		10.8	13.9	15.0	18.5	21.5	26.0
Gms Fiber/lb		49	63	68	84	98	118

Additional Recommendations

- Chart shows Net Energy Gain, Fiber and Gms of Fiber per pound of feed by feeding various percentages of Jackpot .49 DX in combination with Guts Fully Loaded.
- Remember 100% of the Jackpot.49 DX provides the most depth of body and spring of rib obtainable and still achieve maximum gain. As Net Energy gain is lowered and Fiber raised gain will decrease and depth of body and spring of rib will increase.
- Ration #1 will be the maximum gain, depth of body and spring of rib obtainable without giving up gain.
- Ration #2 will be less gain than #1 providing increased volume & depth of body with gain declining and depth of body and spring of rib increasing through ration 06.
